Commands to be tested on Linux and Windows

1. Create the following nested directories at once (Linux: mkdir -p Windows: md):
 - a. /mca/bda/sessional
 - b. /mca/da/mkr/asg1
2. Create the following files:
 - a. Empty file 'sessional.txt' in /mca/bda/sessional directory (Linux: touch filename Windows: type nul> filename)
 - b. Copy an existing file (or the above file) to /mca/da/mkr/asg1 directory (Linux:cp Windows:copy)
3. Run the following commands with your own examples:
 - i. ls dir
 - ii. cp copy
 - iii. mv ren / move
4. Show the content of any text file in the console (terminal: Linux: cat Windows: type) and also by Java class (Write a Java Program and Run in both Linux and Windows).
5. **440Volt:** Remove the above directory tree using one command (Linux: rm -r Windows: rd/s)
6. Find/search file. (Linux: find Windows: dir)
 - a. find . -name 'a.txt' [Linux]
 - b. dir/s a.txt [windows]
